

NZ'S LEADING STORAGE BLADDER/ FLEXIBLE TANK SUPPLIER

And here's why our water storage bladders are so popular

- Extremely well priced and a great alternative to other types of storage
- Wide range of sizes available, with the ability to custom make to your requirements
- The quality of the product, with the fabric and bladders been 100% made in France, under quality standard ISO 9001-2015 version approved
- Made from the very latest European made pretensioned fibre reinforced fabric delivering extra strength, no stretch, and reduced weight

ADVANTAGES OF A WATER BLADDER

- Very cost-effective storage solution
- No loss of valuable water due to evaporation
- No access for airborne materials or other types of contamination
- The quality of the water is maintained with the exclusion of air, light and other contaminants
- They are safe, there is no risk of anyone falling in
- Quick and easy to install and do not require major civil engineering work, only a compacted sand pad
- Earthquake proof
- Can be moved to another location and used again
- Can be depreciated at up to 20% per year, as it can be rolled up, moved, and sold if required

ABOUT PRECISE DE

Our goal is to deliver to our customers a range of high quality, innovative and market leading products, advice and services. We are also a Farm Dairy Effluent System Design Accredited Company and have been involved in the successful design of hundreds of dairy effluent systems both locally and overseas, so when it comes to selecting the right products for the job experience really does count.
